

s!!z: Hello Ryan Cole. We are honoured that you give us a short interview. Ryan Cole is one of the biggest pathology doctors in our extreme situation with the pandemic. You are from the United States of America and together with Arne Burkhardt and other medical doctors on the stage of the Better Way Media Conference in Vienna – yesterday in the panel and today here on stage. And like a good crime movie, you know, the police officers catch the murders, but the pathology doctors always find the reason for what has happen, because they see what is done. And you, Ryan, tell us today on stage, you know you see things, if we know 1% of this things, all this what happen stop in a second. And I want to ask you, what do you find is the reason for it don't stop, because you tell the truth not only at this day, you told this before and before. Why they don't listen?

RC: I wish they would listen. If they knew 1% of what I know and Dr. Burkhardt knows and we pathologists see, they would stop the shots immediately. We see spike protein depositing in the blood vessels, in the hearts, in the brains, in the ovaries, in the organs of the body, all throughout the body. The spike protein that these genetic shots are making your body make are landing everywhere and causing inflammation and making the cells of the body become a target for your immune system, causing most to be destroyed. This spike proteins are waking up mechanism that can cause cancer. They are allowing other viruses to wake up. They are destroying basic energy producer of our cells, the mitochondria. They are causing chronic inflammation throughout the brain. They are causing the immune system to make autoantibodies to attac yourself. There are so many things, that's weakening our t-cells and t-cells and many other immune cells are going away, going down the lower level. So other infections can wake up in the body. And then they are making your body an antibody that will enhance or make an next infection with the corona virus even worse and thats just a few things. So this are the most harmful medical products ever released on humanity. We are harming humanity. No child in the wordl needs this shot. Certain nations have stopped it. Denmark stopped it for children, now they stopped it for age under 50. Other nations are doing the same. This is nothing, but harmfull at this point. None of them were ever helpfull, but now we inow they are harmfull. If they are not safe, it doesn't matter if they are effective or not. These are not safe and we just need to protect not only the children, but the world.

s!!z: I thank you so much for giving us this statement. Dr. Ryan Cole, the patholgc expert from the United States of America. Thank you very, very much, Ryan.

RC: Thank you!
